

Changes to Pay.Gov

Effective August 28, 2005, ECF users paying fees through the Internet credit card system (Pay.gov) must use either Internet Explorer 5.5. and higher or Netscape 7.x as your browser. Previous versions of Pay.gov were compatible with Netscape 4.7, but because of required upgrades to the Pay.gov system, browser upgrades on your computers may be necessary.

To verify which browser and version of that browser you are using, follow these procedures:

- While your browser is open, click on the "Help" pull-down menu within your browser's software
- For Netscape--click on "About Communicator"
- For Internet Explorer--click on "About Internet Explorer"
- You will then see a screen which will display the current version of your browser.

Updates to both Internet Explorer and Netscape are available at the following links:

[To download the latest version of Internet Explorer click here.](#)

[To download the latest version of Netscape click here.](#)
